

Session4.4: India

Template for national strategy for action for transforming official statistics in support of the 2030 development agenda

Data and Statistics Demands raised by SDGs

- SDGs has come into effect on 1 January 2016 with a much broader ambit in terms of scope and coverage than the data requirements under MDGs.
- Fulfilment under SDG commitment places new demands on quality data and statistics, disaggregated by location, sex, age, income group and other dimensions of development.
- This can be achievable only with the active involvement of all stakeholders including the subject Ministries and State/UT Governments in a coordinated efforts manner in developing a broad statistical indicator framework to make available key indicators as part of the SDG requirements.
- Major investments are also required on statistical instruments, such as censuses, household/establishment surveys, statistics for local level development, strengthening civil and sample registration systems and also compiling relevant statistics from existing administrative records.
- increase use of ICT tools for faster dissemination of results.

Developing/reviewing indicator framework for national development plan

Output1: Development of National Vision 2030 document and its monitoring framework

Activity & time	Lead Agency	Partners	products
1.0. Development of National Vision Document 2030 (tentative March 2017)	NITI Aayog	All Central Ministries and State Governments	National Development Plan incorporating the SDGs priorities and State vision
1.1. Consultation with central Ministry and state Govt (Dec 16)	NITI Aayog	-do-	-do-
1.2 Development of Sub – National Vision Document with Sectoral Focus (Dec 2016)	State Govt (planning)	State Govt and stakeholders	State Development Plan/Vision Document
1.3 Consultation with state departments (dec 16)	State Govt	-do-	State Monitoring Matrix

Output1: Related to supporting implementation and monitoring of national development plans (e.g. SDGs are integrated into national development plans and an indicator framework built that monitors national, (sub)regional and global development priorities)

Activity & time	Lead Agency	Partners	products
1.4 Intra-Sectoral identification of Priorities and targets (Nov 16)	Sector specific , Central Ministry	All stakeholders partners (Concern state ministry and Other development partners)	Monitoring Matrix
2.0 Consultation for development of National indicator framework for National Development plan and SDGs (Sept 16)	MoSPI and NITI	All Central Ministries and State Governments and development partners	Draft Strategy plan for preparing National Dev Plan and Indicator matrix
2.1 State Consultation workshop on draft strategy (Oct –Nov 16)	State Govt (Planning Dept)	All state level stakeholders partners (MOSPI and NITI and Dev partners)	Finalization of State monitoring matrix and Identification of Data Gap
2.2 Preparation of NSDS and state Stat dev plan (Assessing Capacity Building development plan) (Sept 17)	MOSPI and State planning dept	All stakeholders partners	NSDS including state specific strategic plan

Transforming official statistics in support of 2030 agenda

Output2: Related to activities required for development and implementation of a national strategy for transforming official statistics under all elements (session 3.2) for transformation (e.g. A national strategy for transforming official statistics that developed and implemented)

Activity	Lead Agency	Partners	products
1.0 Revisit official statistics vs global best practices , existing Statistics act 2009 and requirement of SDGs	MoSPI	Subject matter Ministries / Deptt.	National Policy of Official Statistics
Improve on survey system and administrative data system by bringing new innovative methods	MoSPI	Subject matter Ministries / Deptt.	Innovative methods for administrating data system
Development of Sub-National statistical system with specific focus to make independent functional entity with support from NSO	State Govt (planning)	Concerned state Deptt.	State SDS and Strengthening of State statistical functionaries
Ensuring use of information from administrative data system for planning and decision making (Required of integration of data system)	MOSPI and State Planning deptt	Subject matter Ministries / Deptt.	Integration of data system for decision making process

Transforming official statistics in support of 2030 agenda

Output2: Related to activities required for development and implementation of a national strategy for transforming official statistics under all elements (session 3.2) for transformation (e.g. A national strategy for transforming official statistics that developed and implemented)

Activity	Lead Agency	Partners	products
Ensuring proper dissemination strategy of statistics to people through established mechanism and improving public statistics literacy	MoSPI	Subject matter Ministries / Deptt.	Improved date storage and dissemination of official statistics
Exploring the new data source	MoSPI	Subject matter Ministries / Deptt.	Bridge the data gaps as far as possible for meeting growing data demands

- Thanks you !
