## Some main challenges

**10.7.1\*Recruitment cost borne by employee as a proportion of yearly income earned in country of destination** (don't have metadata, new concept, not clear...)

- Challenges:
  - Lack of information of labor in host countries (Japan, Korea...)
  - Higher demand of data in case lack of statistic capacity
  - New data sources require new survey methods
  - Timeliness of statistical information
  - The accuracy of administrative data for official statistical activities .

4

## Next step

- Continuing to localize indicator 10.7.1 and develop the metadata
- Researching, compiling in pilot 10.7.1 indicator from various sources, from administrative data, from big data...
- Strengthening statistical capacity
- Mobilizing technical supports from international organizations especially on statistics and labor issues (SIAP, ILO, etc...)
