SBRs and Economic Surveys

- Purpose of SBRs is economic surveys

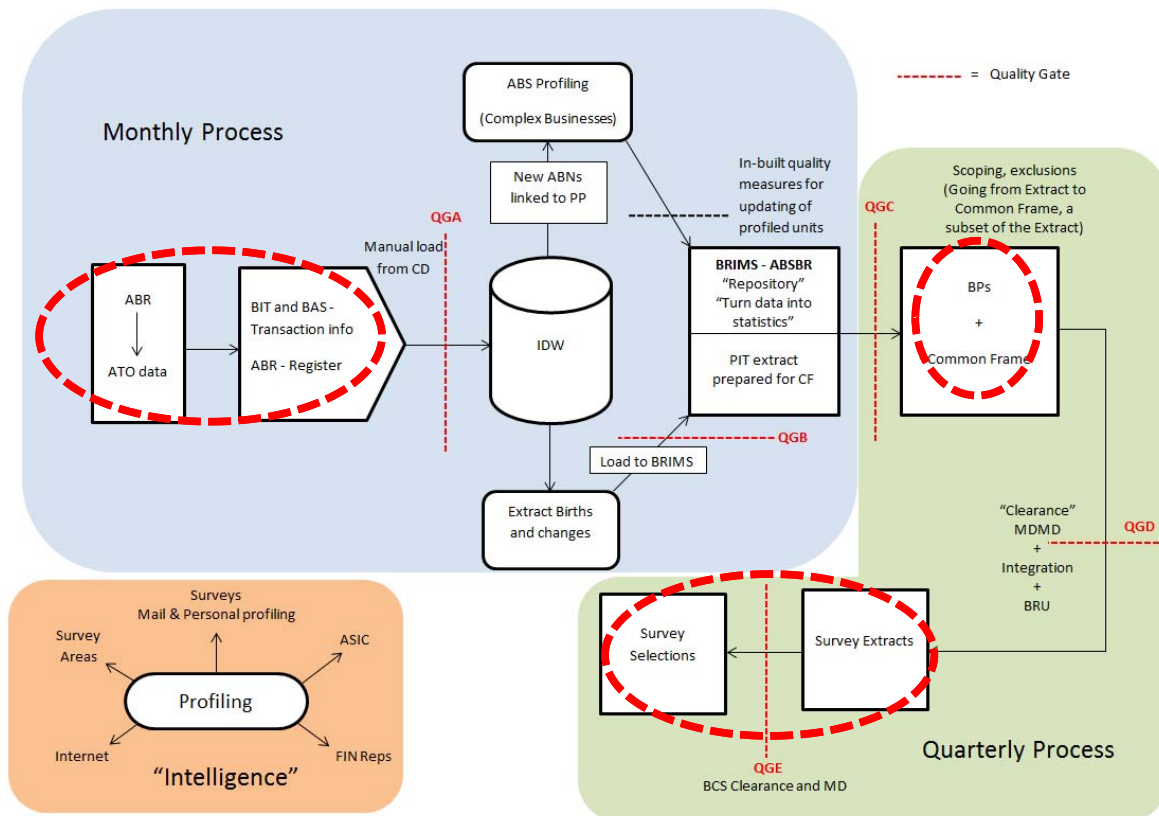

Australian Statistical Model

Economic Surveys

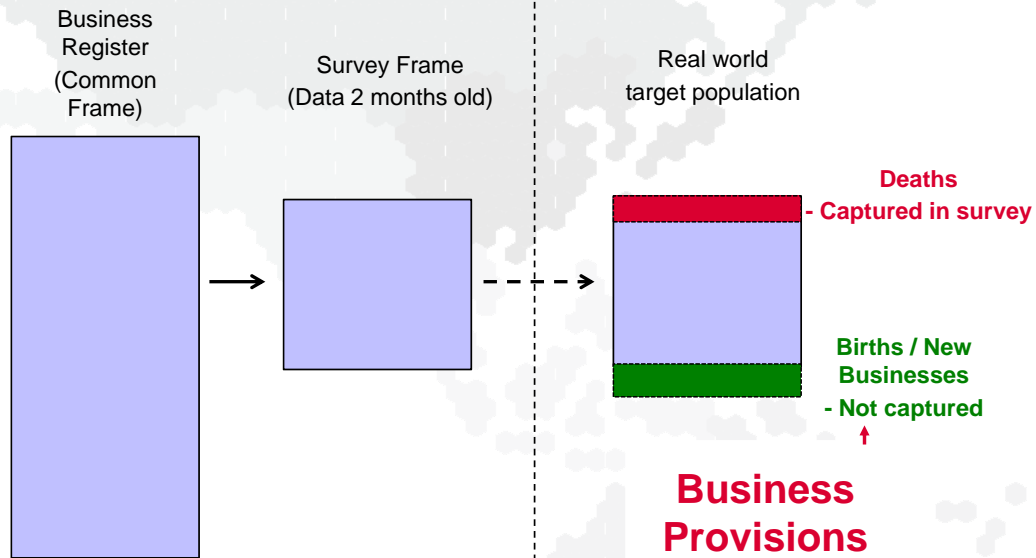

- Annual Economic Survey
- Quarterly Business Indicators Survey
- Retail sales survey
- Capital Expenditures (Quarterly)
- Average Weekly Earnings
- Job Vacancies Survey
- Producer Prices Survey
- R&D survey
- Survey for International Trade in Services

SBR Products

- Common Frame (frozen frame)
- Survey Frame
- Sample units & contact details
- Income and Wages (Tax data)
- Business Provisions (BPs)
 - BPs exist to adjust for time lag between getting data and running surveys
 - Same issue faced when using Economic Census for survey frames

Business Provisions

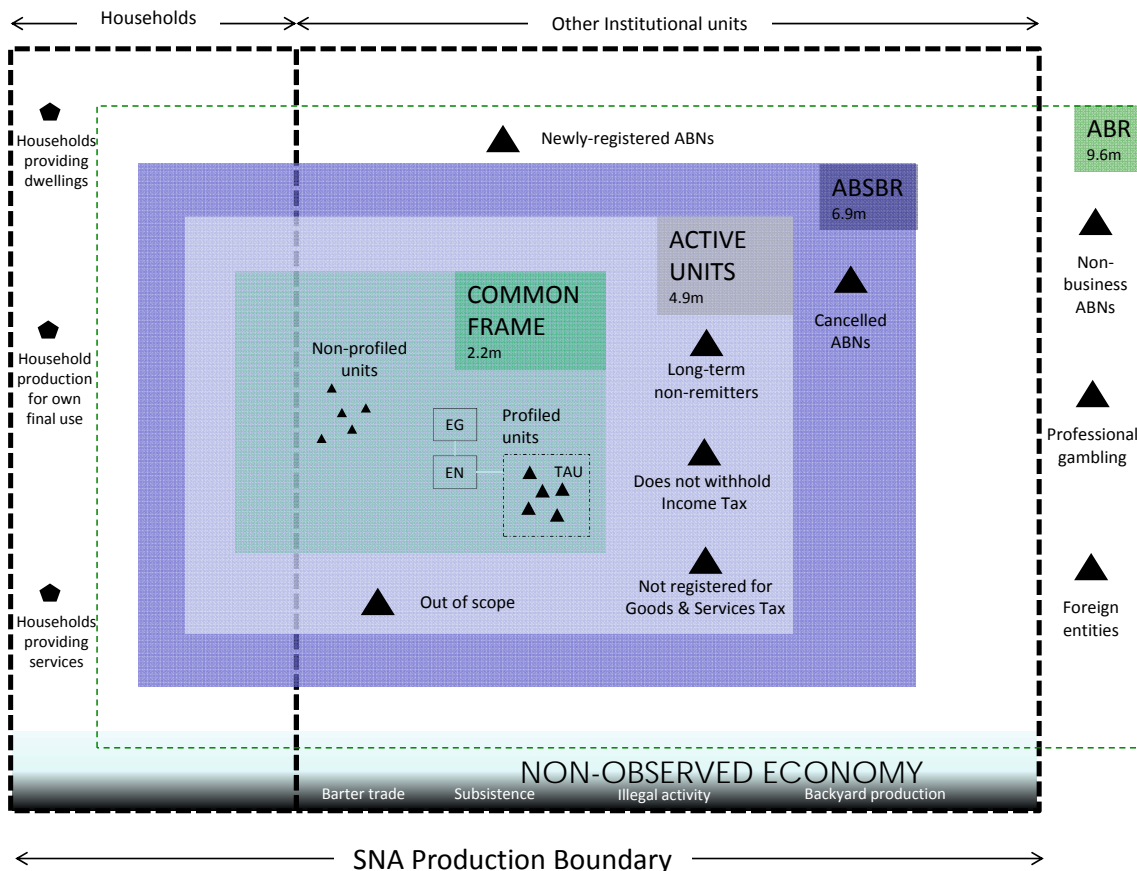

Business Provisions

- Time delay between registration data getting to SBR and survey frame
- 2 months missing data for quarterly economic surveys
- We adjust result by BPs
- Biggest impact is on monthly retail survey (1-2% increase in reported data)
- Similar work can be (and is) done for Economic Census

Common Frame

- The CF a point in time snapshot of the SBR used to create survey frames for the economic collections
- Frequency of CF
 - Frequency of surveys
 - Frequency of updates (admin and manual)
 - Cost of production
- Multiple areas involved requires effective coordination and communication

Common Frame Preparation

- Update with latest Business Registration data
- Final updates from surveys
- Shut down of SBR – no more profiling
- Run audits and validations
- Fix any errors
- Clearance report
- Clearance meeting
- Released

Q&A

- Thank you
